Thanks Jamie. I agree with Erin it would be good for the four of us to discuss.

Jodi

Thanks for sharing Jamie. Some interesting feedback in there. My vote would be for the four of us to get together and talk if we can find a few minutes.

Ex. 5 Deliberative Process (DP)

They discussed the lagoon liner being breached and concerns with ground water. The ground water monitoring they've discussed on different calls is underway and some samples are apparently at a lab but they have not yet seen the results. Our understanding is that area residents are not to be using ground water for drinking water due to historical concerns but NDEE indicated that you can't be certain someone isn't pulling water somewhere.

Attached to this e-mail is a note I received from Tom Steeger, an OPP scientist this morning; an NDEE e-mail sharing monitoring data from 2019 (I believe that has been shared previously); and, notes from a recent webinar by a UNL apiarist with managed bees at a nearby research farm.

If you all would like to discuss or if I can help with anything, let me know.
Thanks.
